About QA/QC position:

Summary of Qualifications

I have approximately 3 year in IT industry as a Software QA/QC Engineer. I have an experience in manual testing of web applications and web-sites, analyse requirements and clarifications, estimation tasks, test case design, implementation and execution test cases, registration and bug tracking, conformation and regression testing, mentoring new team members, creating test plans, test strategy and summary reports for new features. Ability to organize, prioritize, work in a fast-paced and find innovative solutions.

Self-motivated, friendly and sociable, quick learner and have good logical thinking skills. Also, I want to add that due to the heavy workload of the company – I've taking over some of the tasks of the SEO specialists.

About Front-End Development position:

Summary of Qualifications	I thought that "why i have to stop at one direction in IT, if I can develop myself in something else?" That`s why I have been trying to develop myself in Front-End Devepment. At the moment - I have no real commercial experience, but I have been creating simple landing pages both in JS / jquery and React layout.
